

# HARPY EAGLE TOUR 4 DAYS

The 4-day tour is a wonderful journey by motorised and rowing canoe, from the Cuyabeno Reserve to the Aguarico River. Passing through different rivers and lagoons, we travel through beautiful landscapes and observe a wide variety of wild animals. For example, monkeys, sloths, snakes, pink dolphins and caimans. We enter an area far from other tourist activities, inhabited only by indigenous communities. Spending the nights in cabins and tents in the middle of the jungle, we come into direct contact with nature. The main attraction of this tour is the observation of the harpy eagle, one of the largest birds of prey in South America, in its nesting place.

## THE PRICE INCLUDES

## IMPORTANT INFORMATION:

When participating in an adventure expedition in the Amazon, it is important to be cautious. We will observe wild animals in their natural habitat and may be exposed to weather conditions such as heat, rain, or wind. The tour operator's team knows the area and has extensive experience, so it is important to follow their instructions at all times to ensure a wonderful and safe experience for the entire group. The operator is not responsible for unauthorised activities.

Passengers must inform us of any illnesses, allergies, dietary restrictions or other special conditions before the trip.
